SUBJECT INDEX

AC electroluminescence device, 83
Alkyl complexes, 15
Artificial leaf, 167
Artificial photosynthesis, 193
Charge separation in dyads and triads, 291
Covalently linked polypyridine rhenium(I)/ruthenium(II) and
  rhenium(I)/osmium(II) complexes, 221
Cyclometalating ligands, 33, 117
(Dimethylsilyl) quinoline derivatives of rhodium(III) and iridium(III), 201
Dinuclear ruthenium and osmium compounds with triazole ligands, 161
Electronic and resonance Raman spectroscopy, 1
Electron localization of $[Ru(bpy)_3]^{2+}$, 39
Excitation avalanche, 125
Excited state distortions, 1
Excited state dynamics, 125
Higher oxidation states, 15
Homo- and hetero-polynuclear complexes of ruthenium(II) and osmium(II), 255
Intersystem crossing in Fe(II) coordination compounds, 275
Intramolecular energy transfer, 297
  in polyoxometaloeuropate lattices, 83
Langmuir-Blodgett (LB) films, 73
Laser-induced fluorescence, 111
Long chain polynuclear complexes containing rhenium(I) and ruthenium(II)
  polypyridine moieties, 261
Metal-silicon bonded complexes, 201
Metallocenes, 111
Mixed-ligand azido transition metal complexes, 131
Mixed-metal ruthenium(II)/rhenium(I) complex, 297
Mn, Re complexes, 331
Molecular photovoltaics, 167
Multielectron charge transfer, 91
Multimetal systems, 319
Olefin activation by transition metal complexes, 325
Photoinduced electron and energy transfer, 47
Photopolymerization, 97

Photosensitizer covalently linked to electron donor and acceptor groups, 291
Platinum complexes with aromatic cyclometalating ligands, 117
Polycarboxylate associates, 249
Polymers, 47
Polynuclear metal complexes, 227
Polyoxometaloeuropate lattices, 83
Pressure effects, 153
Primary steps in the photochemistry, 337
Pt(II) bipyridine and phenanthroline complexes, 145
Rh^{3+}-complexes, 33
Rhenium-nitrogen multiple bonds, 27
Ru(II)-Cr(III) chromophore-luminophore complexes, 267
Second sphere photochemistry, 249
Silver zeolites, 193
Solid state effects, 145
Square planar platinum(II) dithiolate complexes, 237
Supramolecular photochemistry, 227
Theoretical developments, 175
Vitamin B_{12} derivatives, 215
